ABOUT ME:

I'm a Jr Full-stack developer. I'm a self-taught enthusiast of technology and web development, having used various platforms to improve my knowledge about software technologies such as: React | | React native | Redux | JavaScript | HTML5 | CSS3 | Express | PostgreSQL | Sequelize | SQL | Node JS | GitHub. I have finished the +800hs SoyHenry bootcamp currently working on individual projects, improving my knowledge more and more. I would love to grow in the Front-End development or mobile development, although I'm capable of working on back-end as well.

SKILLS

- React
- React Native
- Redux
- JavaScript
- Node JS
- Express
- SQL
- Sequelize
- FireBase.
- Styled Components
- HTML
- CSS
- Boostrap
- Less

IT EXPERIENCE

FRONT-END - "WEATHER APP"

HENRY BOOTCAMP - February to March (2022)

Project's Objectives:
- Build a SPA (Single Page Application) using an API (Open Weather) to gather the data.
- Technologies used: React and Redux.

FULL STACK - "RAMFLIX"

INDIVIDUAL PROJECT - May to June (2022)

Project's Objectives:
- Create a SPA, replicating the official Netflix page.
- Build an App using React, Redux and FireBase.

FULL STACK - "APP PI DOGS"

HENRY BOOTCAMP - April to May (2022)

Project's Objectives:
- Build an App using React, Redux, Node JS and Sequelize.
- Learn and practice the GIT workflow.
